## DETAILED ACTION

### *Priority*

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/117,118, filed on 7/22/1998.

### *Allowable Subject Matter*

2. Claim 1 is allowed.
3. The following is an examiner's statement of reasons for allowance:

The present invention provides a new method for decoding a bit stream data obtained by encoding a target image to be encoded referring to a reference image, which can transmit the coordinate data including the transformation parameters having the Affine parameter for the Affine transform and can produce an accurate predicted picture (specification, page 7, lines 20-23).

Particularly, the new method comprises the following features, which the prior art taken either singly or in combination does not teach:

- extracting from the bit stream data, coordinates point data indicating frame coordinates points of the reference image, coordinates number data indicating a number of frame coordinates points and a compressed image signal related to a target image to be decoded (see only claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
